Professional Summary

Results-driven ITI Graduate and Microsoft Certified Power BI Data Analyst Associate (PL-300) with strong skills in transforming raw data into actionable insights using Power BI, Excel, SQL, and Python. Experienced in data cleaning, modeling, and building interactive dashboards to deliver business intelligence solutions and visualizations that support data-driven decision-making. Passionate about leveraging data to drive efficiency, clarity, and strategic growth.

Education

Information Technology Institute (ITI) _ Power BI Development Track Jul 2025 – Nov 2025
an intensive, hands-on program focused on Business Intelligence, Data Analysis, and Visualization tools and concepts.

Cairo University Sep 2018 – Sep 2022
bachelor's degree – Faculty of Computers and Artificial Intelligence
Major: Operations Research and Decision Support

Internships & Trainings

National Telecommunication Institute (NTI) – Data Analysis Training May 2025 – Jul 2025

- Practiced hands-on analysis using Excel and Python, focusing on data wrangling and reporting.
- Completed mini projects involving real datasets and performance tracking.

Brainwave Matrix Solutions – Data Analytics Internship Apr 2025 – May 2025

- Worked on real-world data analysis tasks using Power BI and Python, including cleaning, modeling, and visualization.
- Delivered interactive dashboards and reports as part of a structured internship program.

Certifications

Microsoft Certified: Power BI Data Analyst Associate (PL-300) Oct 2025

Issued by Microsoft

Credential ID: A91A532A0A2C5F3D [View Credential](#)

Technical Skills

Data Analysis Tools: Power BI (DAX, Power Query), Excel (Pivot Tables, Power Pivot), Tableau, Python (OOP, Pandas, NumPy, Matplotlib)

Databases: Microsoft SQL Server (Advanced SQL Programming, SSIS, SSAS, SSRS)

Data Warehousing & Modeling: ETL, Data Preparation, Dimensional Modeling

Version Control: Git, GitHub

Languages

Arabic: Native

English: Very Good

Projects

Fitness Center – End to End BI Project ([GitHub Link](#))

- A BI project for a fitness center that includes building the database, modeling the data, creating dashboards, performing RFM customer segmentation, generating reports, and creating a website to manage the business process.
- **Technologies:** Microsoft SQL Server, Transact-SQL, Stored Procedures, Views, Triggers, Indexes, SSRS, RFM Analysis, Data Modeling, Power BI, Excel, GIT, GitHub, Power Pages

Examination System Database – SQL Server ([GitHub Link](#))

- Designed and implemented a relational database in SQL Server to manage the full exam lifecycle including exam creation, question assignment, student submissions, and automatic grading.
- **Technologies:** Microsoft SQL Server, Stored Procedures, Transact-SQL, Views, Triggers, Indexes

Adventure Works Sales Dashboard – Power BI ([GitHub Link](#))

- Built an interactive dashboard to analyze total sales, profit, product trends, and regional performance from the Adventure Works dataset.
- **Technologies:** Power BI, Power Query, DAX, Data Modeling

Supermarket Sales Dashboard – Excel ([GitHub Link](#))

- Designed an **Excel** dashboard to analyze supermarket sales across branches, products, and customer segments with interactive charts and KPIs.
- **Technologies:** Excel, Power Query, Power Pivot

Diabetes Outcome Analysis – Python ([GitHub Link](#))

- Performed exploratory data analysis on diabetes dataset to explore patterns between medical indicators and diabetes risk.
- **Technologies:** Python (Pandas, NumPy, Matplotlib, Seaborn)
